

Krunal Baldha

Quality Assurance Engineer

Detail-oriented Quality Assurance Engineer with 2+ years of experience in manual and automation testing across web and mobile applications. Skilled in test planning, bug tracking, exploratory testing, and Agile methodologies. Passionate about video games and gameplay testing, with a strong understanding of player experience, UI/UX validation, and defect reproduction. Proven ability to deliver high-quality releases through structured testing, detailed bug reports, and cross-functional collaboration.

Work Experience

Quality Assurance Engineer

Jan 2024 – Present

- Executed manual and exploratory testing across web and mobile applications
- Designed and maintained test cases, test plans, and regression suites
- Identified, reproduced, and documented defects using JIRA
- Performed UI/UX validation and usability testing to improve user experience
- Conducted cross-platform testing, ensuring consistency across devices
- Collaborated with developers to verify fixes and perform retesting cycles
- Participated in Agile ceremonies, including sprint planning and retrospectives
- Contributed to the automation framework, improving regression testing efficiency
- Performed API testing using Postman for backend validation

Placement & Training Coordinator - Volunteer

Jan 2023 – Oct 2023

- Coordinated placement drives and managed recruiter communication
- Streamlined scheduling and improved placement workflow efficiency
- Provided support to students and resolved placement-related issues
- Organized university-wide placement events

Software Engineer (Python Developer)

Jan 2021 – Jun 2022

- Developed backend services using Python and REST APIs
- Optimized SQL queries to improve system performance
- Integrated and deployed client-facing applications

Education

Master of Computer Application (MCA)

LJ University - Ahmadabad

2022 – 2024

Bachelor of Computer Applications (BCA)

VNSGU - Surat

2019 – 2022

Gaming & Platform Knowledge

- Passionate gamer with hands-on experience in open-world, RPG, and action-adventure games
- Familiar with Windows PC gaming environments and performance testing
- Understanding of gameplay mechanics, missions, UI flows, and player progression systems
- Experience identifying gameplay bugs such as collision issues, clipping, FPS drops, and UI glitches
- Knowledge of exploratory testing techniques for interactive applications
- Comfortable testing across different resolutions and hardware configurations
- Understanding of player experience and usability in interactive environments

Product / Project and game Involvement

- Worked on multiple SaaS products across B2B, B2C, and gaming platforms, performing functional, regression, and exploratory testing to ensure high-quality releases.
- Performed functional, regression, and integration testing
- Automated repetitive test scenarios to improve efficiency
- Logged and verified defects using Jira
- Validated APIs for data accuracy and performance
- Conducted usability and exploratory testing
